USER MANUAL

Please read these user manual carefully before use!

Contents

Congratulations on choosing our company product! We thank you for your custom.

◆Please note that this product, as all the others in the rich my company range, has been designed and made with total quality to ensure excellent performance and best meet your expectations and requirements.

◆Carefully read this user manual in its entirety and keep it safe for future reference. It is essential to know the information and comply with the instructions given in this manual to ensure the fitting is installed, used and serviced correctly and safely.

◆My company disclaims all liability for damage to the fitting or to other property or persons deriving from installation, use and maintenance that have not been carried out in conformity with this user manual, which must always accompany the fitting.

◆My company reserves the right to modify the characteristics stated in this user manual at any time and without prior notice.

SAFETY INFORMATION

■This lighting fixture is for professional use only - it is not for household use.

■ Installtion
  Make sure all parts for fixing the projector are in a good state of repair.
  Make sure the point of anchorage is stable before positioning the projector.
  The safety chain must be prgperly hooked onto the fitting and secured to the framework.
  When suspending the fixture, ensure that the supporting structure and all hardware used
  can hold at least 10 times the weight of all the devices they support.

■ Mounting surface and fire protection
  Please do not install the fixture onto combustible surface.
  Keep all combustible materials at least 1 m away from the fixture.
  Ensure a minimum clearance of 0.5m around the cooling fans and ventilation.
    Do not expose the front glass to sunlight or other strong light source from any angle.
  Lenses can focus the sun's rays inside the fixture, creating a potential fire hazard.

ta 40℃

■ Maximum ambient temperature

  This fixture is suitable for indoor use and wet locations. Do not immerse in water.
  The ambient temperature Ta: −20℃～40℃.

■ Protection against electrical shock
  Connection must be made to a power supply system fitted with efficient earthing (**Class I**
  appliance according to standard EN 60598-1).
  It is,moreover, recommended to protect the supply lines of the projectors from indirect
  contact and/or shorting to earth by using appropriately sized residual current devices.

■ Connection to mains supply
  The double insulation between the LV power supply and the control conductor on the fixture.
  Connection to the electricity mains must be carried out by a qualified electrical installer.
  Check that the mains frequency and voltage correspond to those for which the projector is designed
  as given on the electrical data label.
  This label also gives the input power to which you need to refer to evaluate the maximum number
  of fittings to connect to the electricity line, in order to avoid overloading.
  Don't use the power cable when the insulation is damaged.
  It must be the manufacturer or distributor or the professional person to change the damaged power
  cable in order to avoid any dangerous.

tc 80℃

■ **Temperature of the external surface**

The maximun temperature that can be reached on the external surface of the fitting,
in a thermally steady state,is 80℃。
Avoid contact bypersons and materials.
Allow the fixture to cool for at least 5 minutes before handling.

■ **Maintenance**

In the event of a serious operating problem, stop using the fixture.
There are no user serviceable parts inside the unit. Do not open the housing or attempt any
repairs yourself. In the unlikely event your unit may require service, please contact your
nearest dealer.

Before starting any maintenance work or cleaning the fixture,cut off power from the
mains supply.

■ **Protection against explosion**

The protection screen, lens or ultraviolet screen on the lamp can be damaged to the degree
of failure if visible damage, such as a crack or deep mark, should be replaced。

■ **Protection optical radiation**

Never look directly into the light source. You risk injury to your retina, which may induce blindness.
Do not look at LEDs with magnifiers, telescopes, binoculars or similar optical instruments that may
concentrate the light output.

■ **Battery**

This product contains a rechargeable lead-acid battery. To preserve the environment, please dispose
the battery at the end of its life according to the regulation in force.

■ **Execution standard: product execution gb7000.1-2015, gb7000.217-2008 standard.**

The products referred to in this manual conform to the European Community Directives to which
they are subject:
Low Voltage 2014/35/EU
Electromagnetic Compatibility 2014/30/EU

PROFESSIONAL SHOW LIGHTING

TECHNICAL INFORMATION

● **Power supplies available** ：
100V~240V~ 50/60Hz

● **Power** ：
800W，PF0.985

● **Light Source** ：
OSRAM 40W，RGBW 4 in 1 LED chip

● Luminous flux：12205 Lm

● **LED QTY**：19PCS.

● **Average life**：30000h

● **Lens & Zoom**：
High precision combination lens,linear adjustment.

● **Zoom angle**：4.5°～60°.

● **Color**：RGBW macro color system.

● **CCT**：
Color temperature adjustable range: 2500～10000K

● **Ring Control**： Yes
Independent control of outer and inner ring.

● **Lens rotation**：
Rotating front lens for countless vortex effects, for aerial or "kaleidoscopic" projection use.

● **Luminous ring**：
The front luminous circle can be controlled by single point, and the flow color change effect can be pursued at will.

● **Strobe**：1-30 times／second electronic strobe and random strobe.

● **Dimmer／Shutter**：
Electronic dimmer，provides four dimming options；various strobe effect.

● **Pan、Tilt** ：
X/Y Travel: 540°/218°
X/Y Resolution: 2.11°/0.85°
X/Y Speed: 2.5S/1.2S

● **Control Mode** ：
DMX512, RDM, Stand-alone mode , ArtNet, Wireless DMX512（optional).

● **Channel** ：
Standard-1（26CH）、
Mode-2(45CH)、
Mode-3(98CH)、
Mode-4(79CH)、
Mode-5(22CH)、
Mode-6(16CH)、
Mode-7(39CH)、
Mode-8(35CH)。

● **Display Menu** ：
- The display panel adopts a 1. 91-inch OLED screen, which is used in both Chinese and English languages to facilitate quick operation and browse menus.
- Display board can record device's using time , show device's temperature, channel data and software version .
- Menu can be edited or called built-in the program.

● **IP set** ：
Automatic chang battery, IP could be set without electricity.

● **Software upgrade** ：
Update via DMX link Channel。

● **IP66 protection**：IP66

● **Safety Devices** ：
- BIPOlar circuit breaker with thermal protection.

● **Cooling** ：
Forced ventilation with axial fans.

● **Working mode** ：
Auto mode, Stage mode, Studio mode.

● **Outlooking** ：
Metal base and anti-fire plastic.

● **Light size** ：470×333×563

● **Box Size** ：530X395X635MM
N.W.: 29.0kg ，G.W.:32.8kg

● **Flycase Size**：
925X580X785MM
N.W.: 58kg ，G.W.：101.8kg

INSTALLATION AND CONNECTING
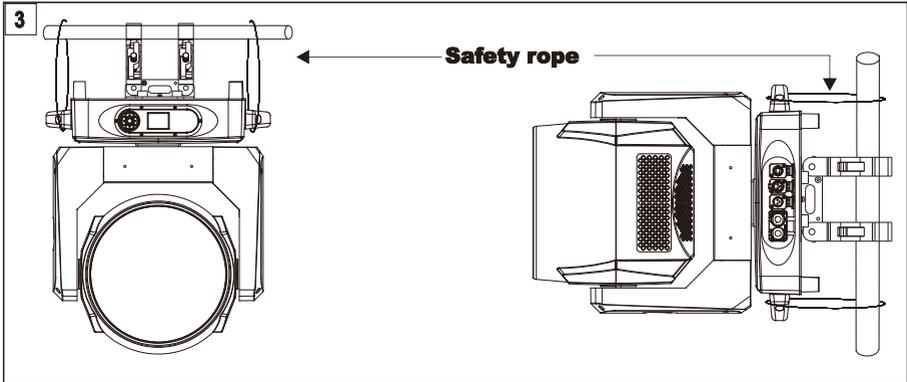

Installing the projector- Fig. 3

Compact,standard clamp system equipped & easy installation

The projector can be installed on the floor resting on special rubber feet, on a truss or on the ceiling or wall.
WARNING:with the exception of when the projector is positioned on the floor, the safety rope must be fitted.
This must be securely fixed to the support structure of the projector and then connected to the fixing point at
the centre of the base.

Make sure all parts for fixing the projector are in a good state of repair.
Make sure the point of anchorage is stable before positioning the projector.
When suspending the fixture, ensure that the supporting structure and all hardware used can
 hold at least 10 times the weight of all the devices they support.
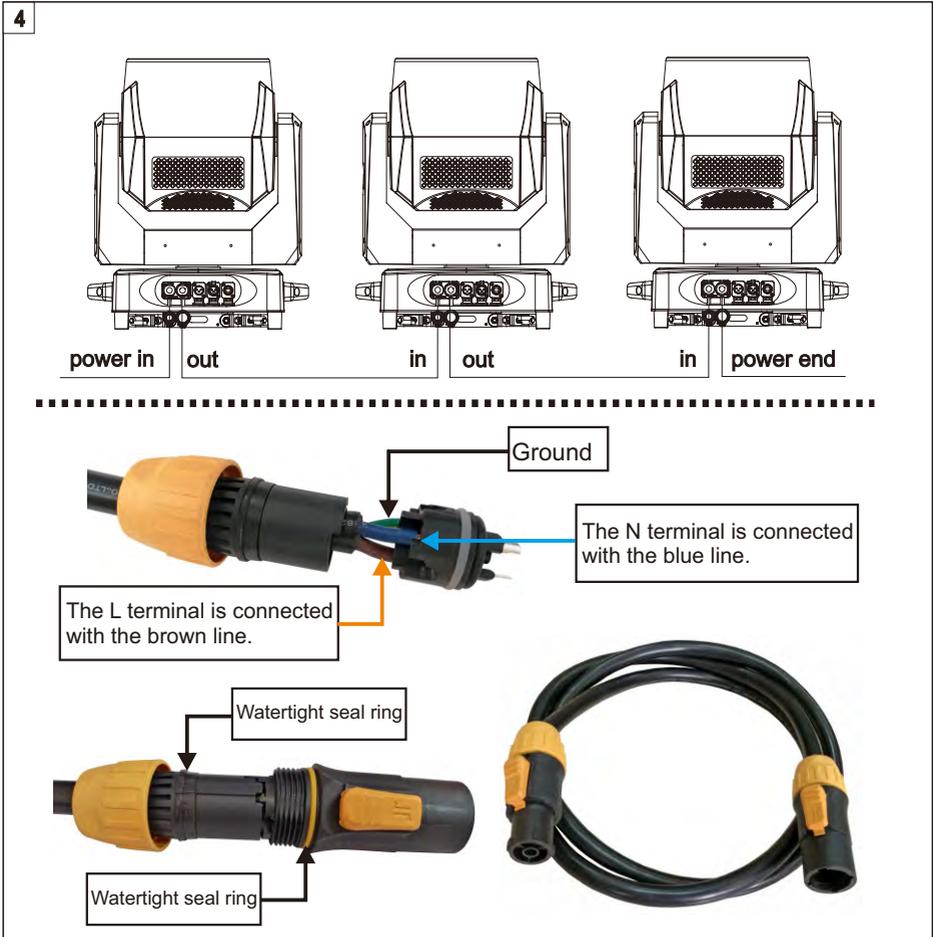

Connecting to the mains suppply ---Fig 4

● The stage lighting power supply can not be more than 2pcs pre line

●   connection to the eiectricty mains must be carried out by a qualified electrical installer.

●   After doing the above operation and making sure all the devices had been installed with natural operate, press the power switch to check whether every -thing is working normally.
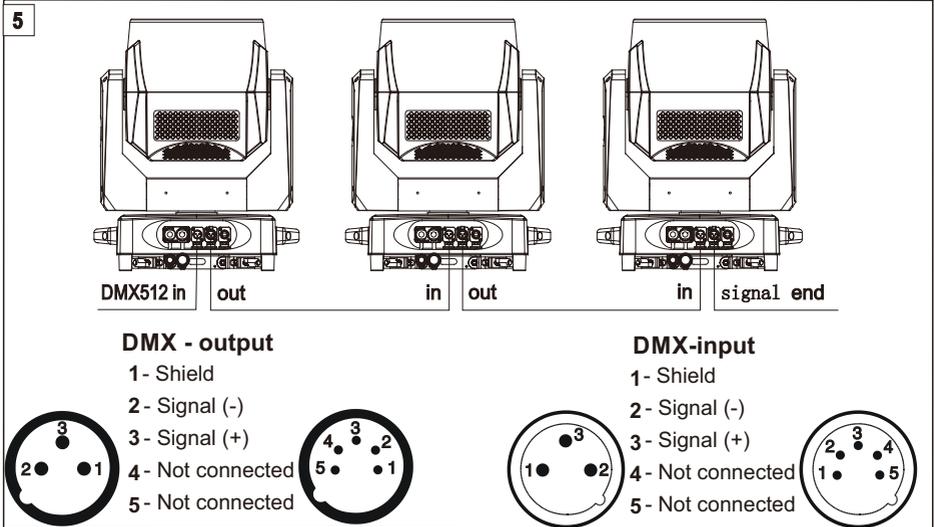

Connecting to the control signal line (DMX) - Fig. 5

◎ Please use the round 3 or 5-pin XLR plugs &sockets offered by menu facture to connect the first
   projector's output to the second projector' input and connect the second projector's output to the
   third projector's input. And in the same way for the rest,eventually connect the last projector's
   output,all the projectors are together.

◎The projectors's control signal output or input by using the 3 or 5-pin XLR pug and socket.If need to
   lengthen the communication cable,please make sure the both side of 3 or 5-pin plug is one to one .
   (one to one,two to two,three to three).Otherwise,the communication cable will be interrupted.The
   communicate cable is 2-cord screened cable 75Ω resistance with each core is at least a 0.5mm
   diameter.(**Caution:**All the inside leading wire of 3 or 5-pin XLR plug couldn't touch each other or
   plinth).

◎Recommend to use the DMX signal terminator for the installation to avoid the electronic noise dama
   -ge the digital control signal.Simply speaking,DMX terminator is an XLR connector with a 120Ω 1/2W
   resistor connected across pin 2 and 3.Which is then plugged into the output socket on the last projec
   -tor in the chain.Refer to the connection.

CIRCUIT CONNECTING DIAGRAM
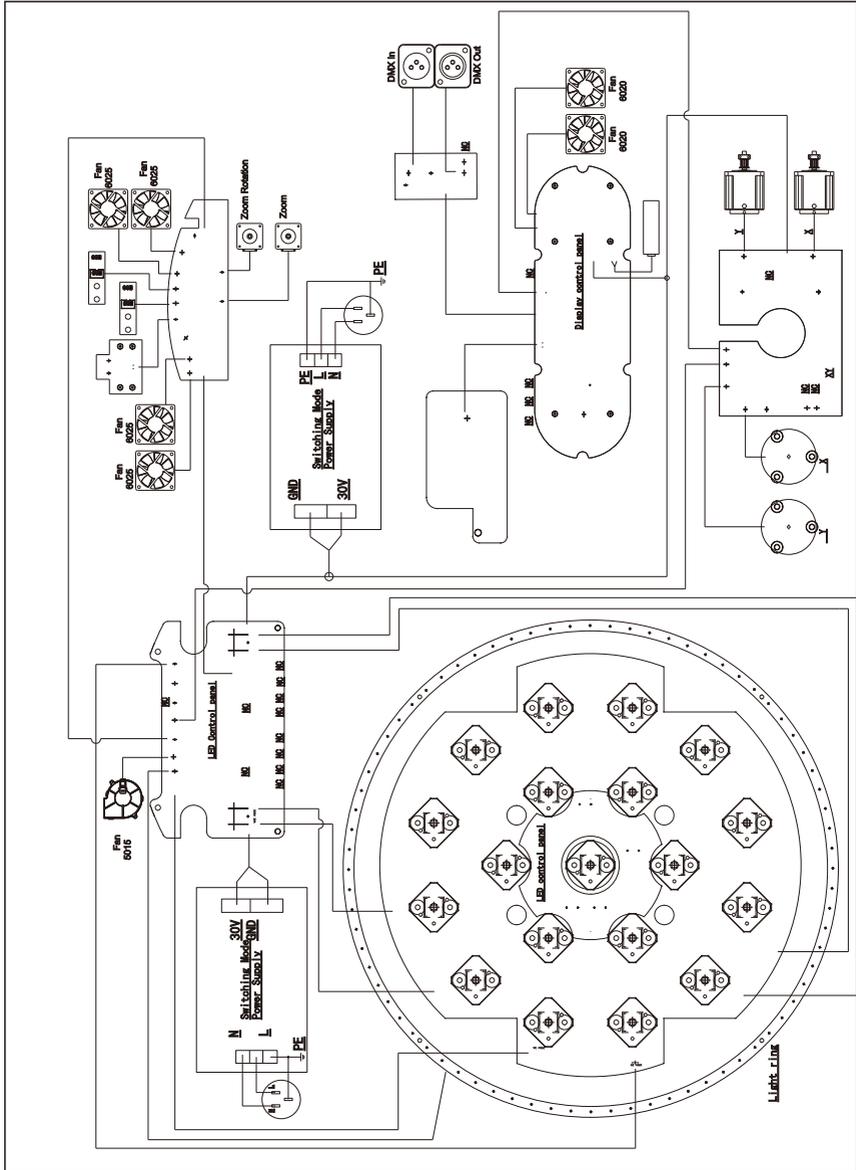

CLEANING AND MAINTENANCES

■1.In order to ensure the projector could work normally. It should be kept clean always .
   The lens should also be regularly cleaned to maintain an optimum light output.
   Do not use any type of solvent on lens. It will damage the projector.

■2.Suggestion: The continue usage of the light don't exceed 4 hours. Or it will shorter the
    usage of the lamp. Please use the alternative operation to solve this problem.
    The fixture power ON time is best not over 48 hours, or it would generate lamp
    protection procedure.

■3.Please disconnect the power supply when begin to maintenance take down the light.
    Please let the parts cool down 10 minute at least then begin to install.

■4.Please inspect the lens or other moving parts timing and keep them clear and static.
    If find anything damaged or looseness must change a lamp or fix the lamp in order to
    avoid the accident.

    Please check the machenical parts is jamging.After cleaning,please add some
     temperature -durable juice.

■5.The light use the strong cool system.It iseasy for the dirty to be colletced.Please do
    clear the hot-sak one time two week at least.

■6. After you use the light,please check the intake place whether there are some wastepaper,
    please clean it up,or the windmill will break down and causing fire.

CAUTION!
Disconnect from mains before starting maintenance operation.

www.lightsky.com.cn

TROUBESHOOTING

It is recommended some solution for some normal trouble shooting. Any inextricability problems should always be handling by the professional person. Disconnect the power supply before maintenance the light.

■ **LED off** :

 1.Please check if install the suitable voltage

 2.Please check whether the led will reach the end of their life can explode; please replace a same description led.

 3.Please check if the power supply is enough.

 4.Please check whether the DMX 512 controller pass the "turn on" order.

■**The light couldn't accept the control order:**

 1.Please check the start code address and the function option are correct.

 2.Please check whether the communicate control cable is on good connection or the cable is too long or interrupt.

 3.Please check the control system is not valid, check the signal amplifier of chain connected is valid.

 4.Please check whether the communicate cable is too long or the other equipment is mutually conjugate.

 5.Please arrange the wire well, shorter the signal cable, put the high voltage cable and low voltage cable separately.

 6.Add the signal amplify isolator.

 7.Signal cable is used the excellent screening doublet (Resistance 75 OHM)

 8.The end of the light end and the end resistance.

■**The light can't move:**

 1.Please check if the power supply is suitable for the light voltage data.

 2.Please check the light if they are deformation, inside parts is broken, become wet etc will lead the loose contact.

 3.Please check the if the iniside lead wire and the connector is loose.

 4.Please check the electric parts(such as the transformer,PCB board,contrller) is short-circuit or burn down.

■ **On working,the pan &tilt couldn't work normally:**

◎Please check according to the above step by step.

◎Please check the belt of the X.Y is broken.

◎Please check the X/Y direction data to the receiver is damage.

◎Re-projector reset.

DUTY EXONERATIVE AND COPYRIGHT PROTECTION

◇The lamp belongs to consumption products that is not guarantee to keep it in good repair.

◇Any products broken that didn't according to the instruction is not guarantee to keep it in good repair.

◇The commentary for all the instruction belongs to the supplier in final.

◇No authorize can't copy.

◇The information in this manual may be changed in the future,the company reserve the right to change the data without any advise.
